SUMMARY

I'm a Full Stack Developer focused on delivering high-quality, user-centric applications. With expertise in React, Node.js, PostgreSQL, and authentication systems like NextAuth, Passport, and JWT, I build seamless, scalable solutions across the entire stack. I'm also expanding into app development to broaden my project reach. I enhance performance and user experience by integrating real-time features, optimizing backend systems, and implementing role-based access control. I'm passionate about transforming complex ideas into polished, efficient applications that drive user engagement and business growth.

EXPERIENCE

Fullstack software developer

Nobox Labs

December 2024 - Present, Nigeria

- **Engineered and deployed scalable full-stack applications** using Node.js, React, Nobox, and PostgreSQL, leading to a 50% increase in server efficiency and measurable improvements in user engagement.
- **Collaborated closely with cross-functional teams** to design and implement user-centric features, resulting in a **25% increase in user retention** and a **30% boost in daily active users** through improved platform usability.
- **Optimized backend performance** by refactoring API endpoints and streamlining database queries, which **reduced server response times by up to 40%** and enhanced stability under peak traffic conditions.
- **Integrated secure authentication systems** using Passport.js with JWT and Google OAuth, reducing authentication-related support tickets by **over 60%** and increasing user sign-up completion rates by **20%**.
- **Led end-to-end feature development** from concept to deployment, including building reusable components and integrating real-time functionalities, contributing to a **35% faster development cycle** and more consistent UI/UX across the platform.

PROJECT

Briza

Personal Project · [briza-nine.vercel.app](#)

- **Designed and developed Briza**, a full-stack social media platform where users can create posts, join interest-based channels, and engage in real-time conversations, delivering a smooth and modern user experience.
- **Implemented a custom role and permissions system**, supporting admin and member roles within channels to ensure structured community engagement and moderation.
- **Built an intuitive post composer** with features like rich text input and personal post pinning, enhancing the content creation experience and encouraging user interaction.
- **Integrated secure and scalable authentication** using **NextAuth**, supporting both credential-based and OAuth flows, which improved user onboarding and cross-platform login reliability.

Linktide

Personal project · [linktide.vercel.app](#)

- **Next.js and TypeScript Integration:** Successfully integrated Next.js with TypeScript to build a scalable and efficient social media manager platform, enhancing both user experience and developer productivity.
- **MongoDB Utilization:** Employed MongoDB as the database to efficiently manage and store user data, ensuring fast data retrieval and scalability.
- **Social Media API Integration:** Implemented multiple social media APIs (Twitter, TikTok, LinkedIn) for dynamic data fetching and posting, allowing users to manage their accounts seamlessly from a single interface.
- **User Authentication:** Developed a robust authentication system using NextAuth for secure user login via OAuth 2.0, providing a safe environment for user data management and interaction with various social media platforms

Glamora

A Personal Project · [glamora-three.vercel.app](#)

- **Next.js and TypeScript Integration:** Successfully applied Next.js and TypeScript for the first time, enhancing my proficiency with modern web development frameworks.
- **State Management:** Integrated Redux Toolkit into my Next.js project, optimizing state management and improving application performance.
- **API Utilization:** Implemented and utilized a makeupt API to dynamically fetch and display data, enhancing the functionality and interactivity of the application and efficient code, contributing to the overall quality and scalability of the project.

SKILLS

HTML, CSS, JavaScript, TypeScript, TailwindCSS, React.js, Next.js, Redux, Git, MongoDB, PostgreSQL, ExpressJS, NextAuth, PassportJS, Jwt
